Web API example

Programming playbacks

Starting point to programm playbacks using the Web API. Inspired by a project where the customer shall be able to program simple cues. Also this might be the starting point for more sophisticated applications.

Also this solves the mystery about the 'separate programmer'.

author, date	Sebastian Beutel, February 2022
published	here, Youtube
prog. lang./ framework	simple text editor (I used the Web API Demo to play with the requests)
description	collection of http requests used to program simple cues.
other requirements	e.g. a web browser is required
