2025/12/15 15:29 1/1 Patch IO

Ai Modules

## Patch IO

section	Patch
short description	Special module which conducts ports to a parent patch/to the 'surface' of the patch.
licence level	Anjuna
	Ports are automatically created when patches are dropped onto the module, or onto the patch in the parent patch.
skins	.J.

In order to expose parameters/controls, right-click those controls and select Add to Parent Panel.

## used in example

Plugin Backlinks: Nothing was found.

## **Manual**

Allows data to be passed between patches.
