

Ai Modules

Patch IO

section	Patch
short description	Special module which conducts ports to a parent patch/to the 'surface' of the patch.
licence level	Anjuna
ports	Ports are automatically created when patches are dropped onto the module, or onto the patch in the parent patch.
skins	./.

In order to expose parameters/controls, right-click those controls and select Add to Parent Panel.

used in example

- [CSV Score Board](#)
- [Midi Layer Select](#)
- [Visualiser: Moving Matrix](#)
- [Visualiser: Moving RGB Matrix](#)
- [Moving Screens](#)

Manual

Allows data to be passed between patches.
