System and Factory Patches

To make life easier Ai comes with a number of patches. As like as other patches they are comprising of modules themselves and can be altered to suit your needs. Think of them as subpatches for frequent tasks, A full list of the available system patches is published in the manual which is installed with the software in Distrib\Help\Ai_Man_v8.chm and in the V9 User Manual available at the Avolites Download site.

The system patches used in the examples in this wiki are explained here as well so that you can easily link between patches, modules and their use in real-life patches.

Currently these patches are discussed in this wiki:

E

- Euler To Quaternion

S

- Sample Texture Region Simple
