## **Media Servers**

Strictly, Media Servers are hardware and software which can be remote controlled by Titan. But then, the Media Servers listed here are usually controlled like any other intelligent fixture via DMX/Art-Net/sACN: you patch them and set their attributes. Hence, this is only a list of media servers and media control software which are available to standard control mechanisms. Most of those have various control inputs, i.e. react to Art-Net, MIDI and timecode. Details are available in the respective manual.

Name	Manufacturer	Remarks
Ai	Avolites	since Titan v12 closely integrated via Synergy. can be controlled by DMX, Art-Net, MIDI and some network protocols transmits thumbnails via CITP
