

Example

# Capture - Diagnostics

<b>by:</b>	Alex del Bondio, April 2019
<b>published:</b>	here
<b>description:</b>	show Capture diagnostics
<b>remarks:</b>	

Remarks

- these macros turn on or off the diagnostics in Capture which show you things like frame rate, render details etc. I have not found a way to do this in a generic way on the console.

[capture](#), [diagnostic](#), [settings](#)

## functions

- [ActionScript.SetProperty](#)

## affected properties

- [Visualiser.Capture.ShowDiagnostics](#)

## Code

[capturediagnostics.xml](#)

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros>

  <!-- Diagnostics, Alex del Bondio - April 2019 -->
  <macro id="adb.Macros.Capture.showdiagnostics" name="Capture Show
Diagnostics">
    <active binding="Visualiser.Capture.ShowDiagnostics" />
    <sequence>
<step>ActionScript.SetProperty.Boolean("Visualiser.Capture.ShowDiagnost
ics", true)</step>
    </sequence>
  </macro>
  <macro id="adb.Macros.Capture.hidediagnostics" name="Capture Hide
Diagnostics">
    <active binding="{propertyLink
id='Visualiser.Capture.ShowDiagnostics' converter='Math.NotConverter'}"
/>
    <sequence>
<step>ActionScript.SetProperty.Boolean("Visualiser.Capture.ShowDiagnost
```

```
ics", false)</step>  
    </sequence>  
</macro>  
  
</avolites.macros>
```

## Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to [Formats and syntax](#)

- `Visualiser.Capture.ShowDiagnostics` turns either on or off the diagnostics which are shown in the Capture workspace

## How to use it

- [make this macro available](#)
