Example

Delete Playback

by:	Lucas Wx, April 2018
published:	https://www.facebook.com/groups/Avolites/permalink/1215020168630215/
description:	Deletes a playback.

delete, playback

functions

- Handles.SetSourceHandleFromHandle
- Handles.GetHandle
- Handles.ConfirmDelete

Code

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xsi:noNamespaceSchemaLocation="Avolites.Menus.xsd">
 <macro id="" name="" >
    <sequence>
      <step
pause="0.01">Handles.SetSourceHandleFromHandle(Handles.GetHandle("Playbacks"
,x,x))</step>
      <step pause="0.01">Handles.ConfirmDelete()</step>
     </sequence>
  </macro>
</avolites.macros>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to Formats and syntax

- `Handles.SetSourceHandleFromHandle(Handles.GetHandle(“Playbacks”,x,x))` points Handles.SourceHandle to a particular playback
- `Handles.ConfirmDelete()` deletes this handle

How to use it

- make this macro available
- this is not fully functional - you need to define the exact handle
