Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to
Formats and syntax

These macros are designed to work with specific usernumbers - either you adjust the usernumbers in
the macro or you assign your playbacks the currect usernumbers.

`Playbacks.ReleasePlayback()` releases a certain playback in a given time - which here is taken
from the property `Playbacks.MasterReleaseTime`.

`Playbacks.FirePlaybackAtLevel` fires a certain playback at a certain level.

Here, the playbacks are identifies by their usernumber. Also note the syntax of defining the level.

How to use it

1. make this macro available
2. These macros are designed to work with specific usernumbers - either you adjust the
   usernumbers in the macro or you assign your playbacks the currect usernumbers.
