

Example

# Set Palette Master Overlap

<b>by:</b>	in factory macros
<b>description:</b>	sets palette master overlap
<b>remarks:</b>	listed here as example for active binding

## functions

- [ActionScript.SetProperty.Float](#)

## affected properties

- [Palette.MasterOverlap](#)

## specials

- [Active Binding](#)

## Code

This is part of the factory macros. Palette Master Overlap and Palette Master Fade Times macros have been extracted and put in this file:

macro\_overlap.xml

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xsi:noNamespaceSchemaLocation="Avolites.Menus.xsd">
  <macro id="Avolites.Macros.PaletteOverlap50">
    <name>Palette Overlap 50%</name>
    <description>Set master palettes fade to 50%.</description>
    <active binding="{propertyLink id='Palette.MasterOverlap'
converter='Math.EqualityConverter' converterParameter='0.5'}" />
    <sequence>
      <step
pause="0">ActionScript.SetProperty.Float("Palette.MasterOverlap",0.5)</step>
    </sequence>
  </macro>
</avolites.macros>
```

## Explanation

Last update: 2017/11/26 16:25 macros:example:palettemasteroverlap <https://www.avosupport.de/wiki/macros/example/palettemasteroverlap?rev=1511713556>

---

This macro sets the property `Palette.MasterOverlap` to 0.5. To do so manually you'd press `<Palette> [Master Overlap = ]` and enter a value.

## How to use it

[make this macro available](#)

It might be useful for busking to put some of the related macros, e.g. `Overlap 100%/50%/0%` on adjacent handles. Due to active binding they show which value overlap is currently set to.
