

Example

Set Fan Curve

by:	Gregory Haynes, January 2019
published:	http://forum.avolites.com/viewtopic.php?f=20&t=5962
description:	Macros to set the fan curve. May be put in buttons for easy access. Buttons will show the currently selected curve.
remarks:	

[fan](#), [curve](#), [active](#), [binding](#), [converter](#)

functions

- [Programmer.Editor.Fixtures.Fan.SelectCurve](#)

affected properties

- [Programmer.Editor.Fixtures.Fan.SelectedFanCurveId](#)

control structures

- [Active Binding](#)
- [Math.EqualityConverter](#)

Code

[FanCurve.xml](#)

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"

    converter='Math.EqualityConverter' converterParameter='Pull End'
  }"/>
  <sequence>
    <step>Programmer.Editor.Fixtures.Fan.SelectCurve("Pull
End")</step>
  </sequence>
</macro>
</avolites.macros>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to [Formats and syntax](#)

The macros simply set the fan curve to a specific value. Each macro can be put on a button. Using [Active Binding](#) the button is highlighted if the curve is currently selected.

How to use it

- [make this macro available](#)
- copy the macros on available buttons to quickly change the fan curve.
