

Function

Attribute.Mask.IncludeAll

Void Attribute.Mask.IncludeAll(String maskId)

API	http://api.avolites.com/11.0/Attribute.Mask.IncludeAll.html
description	Set a mask to include all.
namespace	Attribute.Mask
parameter	maskId (<i>String</i>) : Id of the mask Possible values: Record, TempRelease, Update, Patch, Clear, EditTimes, Include, Locate, Align, OnOffPlayback
return value	Void

Example in

[PaletteChaseChanger \(V3\)](#):

Maybe this is faulty as there is no such attribute mask.

```
<step>Attribute.Mask.IncludeAll("Palette")</step>
```

Also used in

- [PaletteChaseChanger \(V3\)](#)
- [Function list](#)
