Function

Handles.Macros.PreviousPage

ASSUMPTION

> This function is not documented and simply found by trying. Hence, this entire documentation is assumed.

```
Void Handles.Macros.PreviousPage()
```

API	no
description	toggles the Macros buttons to the previous page
Namespaces	Handles.Macros
parameter	
return value	(Void)

This function does not fully work as Avolites never intended these buttons to be paged. Handles.Macros.PreviousPage()) decrements as expected – but you can go down to page 0 which probably isn't intended.

Example in

Pages - Change Macros Page:

```
  <macro id="Avolites.Macros.PreviousMacrosPage" name="Static Macros Page
-1">
    <description>Goes to the previous macros page.</description>
    <sequence>
      <step>Handles.Macros.PreviousPage()</step>
    </sequence>
  </macro>
```

Also used in

- Pages - Change Macros Page
- Function list
