

Handles.Macros.PreviousPage

ASSUMPTION

This function is not documented and simply found by trying. Hence, this entire documentation is assumed.

`Void Handles.Macros.PreviousPage()`

API	no
description	toggles the Macros buttons to the previous page
Namespaces	Handles.Macros
parameter	
return value	(<code>Void</code>)

This function does not fully work as Avolites never intended these buttons to be paged. `Handles.Macros.PreviousPage()` decrements as expected - but you can go down to page 0 which probably isn't intended.

Example in

Pages - Change Macros Page:

```
<macro id="Avolites.Macros.PreviousMacrosPage" name="Static Macros Page -1">
    <description>Goes to the previous macros page.</description>
    <sequence>
        <step>Handles.Macros.PreviousPage()</step>
    </sequence>
</macro>
```

Also used in

- [Pages - Change Macros Page](#)
- [Function list](#)
