

Function

# Handles.MobileWing.ChangePage

This is marked to be tested as it probably needs to be [Handles.MobileWingAPlaybacks.ChangePage](#)

## ASSUMPTION

This function is not documented but used in factory macros, and found working. Hence, this entire documentation is assumed.

```
Void Handles.MobileWing.ChangePage(int32 index)
```

<b>API</b>	no
<b>description</b>	toggles the Mobile Wing Fader handles to a specific page
<b>Namespaces</b>	<a href="#">handles.mobilewing</a>
<b>parameter</b>	Int32 index - the index of the page to change to
<b>return value</b>	(Void)

## Example in

Pages - Change Pages:

```
<macro id="adb.Macros.gopagewing1" name="adb Change Page mobile wing 01">
  <sequence>
    <step>Handles.MobileWing.ChangePage(0)</step>
  </sequence>
</macro>
```

## Also used in

**Plugin Backlinks: Nothing was found.**
