Function

Handles.Playbacks.PreviousPage

ASSUMPTION

> This function is not documented and simply found by trying. Hence, this entire documentation is assumed.

```
Void Handles.Playbacks.PreviousPage()
```

API	no
description	toggles the playbacks to the previous page
Namespaces	Handles.Playbacks
parameter	
return value	(Void)

This function does not fully work as Avolites never intended these buttons to be paged. Handles.Playbacks.PreviousPage()) decrements as expected – but you can go down to page 0 which probably isn't intended.

Example in

changepage:

```
<macro id="adb.Macros.PreviousPagePB" name="adb Change Page PB -1">
  <sequence>
    <step>Handles.Playbacks.PreviousPage()</step>
  </sequence>
</macro>
```

Also used in

- Pages - Change Pages
- Function list
