

Function

Palette.ApplyPalette

```
Void Palette.ApplyPalette(Handle handle, Boolean usePaletteTimes)
```

API	http://api.avolites.com/10.1/Palette.ApplyPalette.html
description	Recall the palette on a handle - if the handle isn't a palette handle does nothing
namespace	Palette
parameter	handle (Handle) : the palette handle to apply usePaletteTimes (Boolean) : if set to true use palette times
return value	Void

Example in

[ColourChaseChanger \(V2\)](#):

```
<step>Palette.ApplyPalette("Location=Colours,1,16", false)</step>  
// applies palette from Colours window page 1 button 16 in no fade time
```

For other handle references - by TitanID or user number - see [Handle](#)

Also used in
