| <b>API</b>   | <a href="https://api.avolites.com/12.0/Timecode.MakeTimecodeTime.html">https://api.avolites.com/12.0/Timecode.MakeTimecodeTime.html</a> |
| <b>description</b>   | Create a timecode time value from the specified parameters.   |
| <b>namespace</b>   | Timecode  |
| <b>parameter</b>   | hours ( <a href="#">Int32</a> ) : the hours value   |
|  | minutes ( <a href="#">Int32</a> ) : the minutes value   |
|  | seconds ( <a href="#">Int32</a> ) : the seconds value   |
|  | frames ( <a href="#">Int32</a> ) : the frames value   |
|  | disabled ( <a href="#">Boolean</a> ) : if set to true mark the time as disabled.  |
| frameRate ( <a href="#">FrameRate</a> ) : the frame rate value |   |
| <b>return value</b>  | <a href="#">TimecodeTime</a>  |

## Example in

[Timecode - Winamp Tracks](#):

```
<step  
pause="0.05">Timecode.TimecodeTwo.SetStartTime(Timecode.MakeTimecodeTime(1,  
00, 00, 00, false, 100))</step>
```

Creates a [TimecodeTime](#) object and passes this to [Timecode.TimecodeTwo.SetStartTime](#)

## Also used in

- [Timecode - Set Start Time](#)
- [Timecode - Set Start Time from Palette Fade](#)
- [Timecode - Winamp Tracks](#)
- [FrameRate](#)
- [TimecodeTime](#)
