

Function

Triggers.SelectMappingByName

Void Triggers.SelectMappingByName(String name)

API	http://api.avolites.com/11.0/Triggers.SelectMappingByName.html
description	Selects a mapping by name.
namespace	Triggers
parameter	name (String) : The name of the mapping to be selected.
return value	Void

Inherently this marks a mapping as selected so that its id can be retrieved from [Triggers.SelectedMappingId](#).

Example in

[adminitrigger](#):

```
<step>Triggers.SelectMappingByName("Your Mapping Name")</step>
```

Also used in

- [Trigger - Add MIDI trigger](#)
