

Identifier/Location

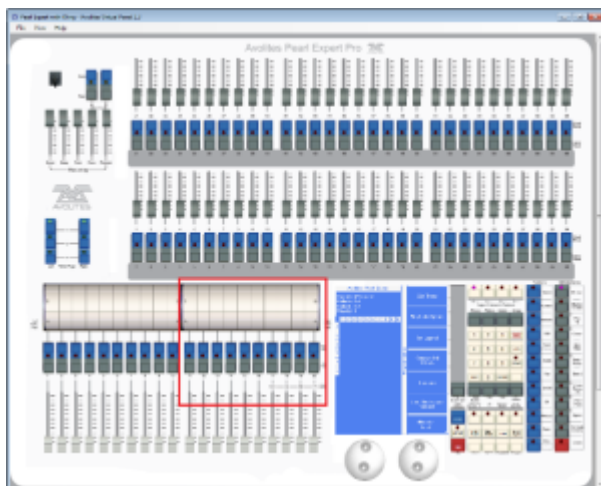

RollerB

This is the main playback area. Due to different designs, there are slight differences on the various consoles:

- On the Pearl Expert, RollerA refers to the right-hand roller. It sports 10 handles on 30 pages in total (10 facets, 3 button pages)
- On the Sapphire Touch, the bottom fader area is only mapped to RollerA - RollerB playbacks (if created on other consoles) are only available in the show library.
- On all other consoles, RollerB (as well as RollerA) refers to the main playback area as well: 10 faders on 60 pages. However, only even pages are referring to roller B while odd pages are referring to roller A.

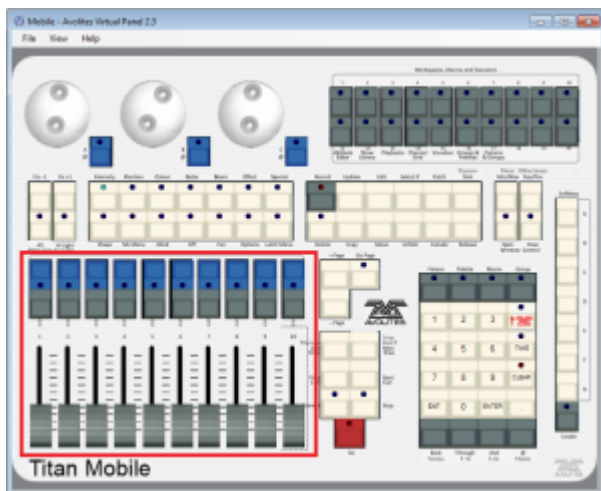

As of version 11, the use of RollerA as location is discouraged. Better use Location:Playbacks instead.

Roller B on a Pearl Expert

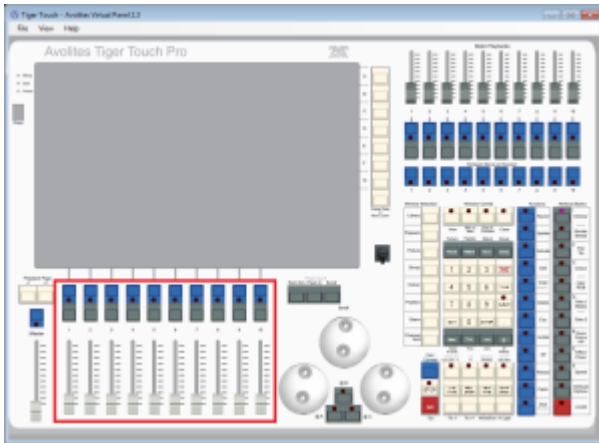

On the Sapphire Touch, roller B playbacks are only available in the show library.

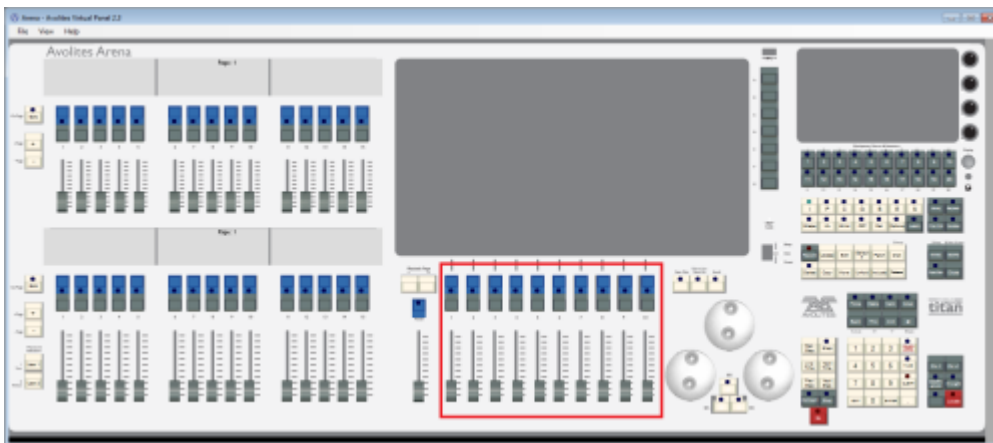

Playbacks on the Titan Mobile (likewise on Quartz and Titan One) - only even pages refer to RollerB

Playbacks on the Tiger Touch - only even pages refer to RollerB

Main Playbacks on the Arena - only even pages refer to RollerB
