

Titan Property

Group.Numeric.IsValid

API	http://api.avolites.com/11.0/Group.Numeric.IsValid.html
description	Holds a boolean whether a group exists or not.
Namespaces	Group.Numeric
type	Boolean

example

```
<step>Group.CheckIfGroupExists(999.0, "Group.Numeric.IsValid")</step>  
<step condition="Math.IsEqual(Group.Numeric.IsValid, True)">...</step>
```

This checks if a particular group exists and stores the result in `Group.Numeric.IsValid` based on which next steps are executed or not.

used in

- [Create/Replace Group \(snippet\)](#)
- [Set Lee Colour](#)
