

Titan Property

# Playbacks.PendingLegend

<b>API</b>	<a href="http://api.avolites.com/11.0/Playbacks.PendingLegend.html">http://api.avolites.com/11.0/Playbacks.PendingLegend.html</a>
<b>description</b>	Gets or sets the pending legend.
<b>Namespaces</b>	<a href="#">Playbacks</a>
<b>type</b>	<a href="#">String</a>

## example

```
ActionScript.SetProperty("Playbacks.PendingLegend",  
Handles.PlaybackWindow.Page.DisplayName)
```

This sets the pending legend to the legend of the current playbackwindow page:

In the example the legend of the playback is also set to the name of the page it is on; not a useful thing to do but there to demonstrate what you can do.

See <http://forum.avolites.com/viewtopic.php?f=20&t=5786>

## used in

- [Store cues with current page names as legends](#)
- [Playback - Record to fixed location](#)
