

Titan Property

Programmer.Editor.Fixtures.WheelsControlAttribute

API	https://api.avolites.com/15.0/api/Programmer.Editor.Fixtures.WheelsControlAttribute.html
description	Gets or sets a value indicating whether the wheels control Levels, Fade, Delay or Visualiser.
Namespaces	Programmer.Editor.Fixtures
type	Enum

example

Set Wheel Mode

```
<step>ActionScript.SetProperty.Enum("Programmer.Editor.Fixtures.WheelsControlAttribute", "Level")</step>
```

Here the property is set in a macro in order to provide a direct access to a certain option, instead of repeatedly pressing the menu button.

used in

- [Set Wheel Mode](#)
