

The Personality Builder

While it is technically possible to edit d4 personalities with any text editor, there is no need to do this: there is a program tailored exactly for this job: the **Personality Builder**. It comes included with the Titan PC suite, is installed on every console (you'll love to have mouse and keyboard though), and is also available [as separate download](#) (at the time of writing this the download link doesn't work). Also there is a [Quick Start Guide](#) available.

There are several videos available about the personality builder - even in various languages: simply [search on youtube](#).

At the moment, the most detailed videos are made by [The Bright Pixel](#):

- [Avolites Personality Builder Part 1](#)
- [Avolites Personality Builder Part 2](#)
- [Avolites Personality Builder Part 3](#)

And here is something about various aspects of building a personality:

- [Creating Conditions](#)
