## **Avolites-Wiki start page**

Welcome to the Avolites.de-Wiki. This site is dedicated to Avolites lighting consoles (see <a href="https://www.avolites.com">www.avolites.de</a>). In particular, this is meant to be a place for custom-created content and information: there are many things not mentioned in the manuals. And as Facebook, youtube and various forums have their difficulties in making things permanently available, this wiki might be a good place.
