# The Fixture Circle

Sebastian Beutel, April 2020

Idea: <https://www.facebook.com/groups/Avolites/permalink/1848601835272042/>

How to arrange your fixtures like on a circle truss:

- download [fixturecircle.xlsx](#)
- open it in MicroSoft Excel
- enter base values
  - Number of fixtures per full circle
  - Base X/Base Z as center of the circle
  - Base orientation as how your fixtures would be orientated normally
  - Radius: the size of the circle
- the cells below show the values for X-Pos, Z-Pos and Y-Rot. Enter them as capture values. Your fixtures are now arranged in a circle.

**Update - See below for a mobile friendly HTML version**

## HTML version

Alternatively here is an HTML version which you can also use without Excel:

<https://www.avolites.de/downloads/fixturecircle>

You can also use it here:
