

Web API request

CueLists/NextStep

Plays the next cue in the specified chase or cue list.

API	https://api.avolites.com/12.0/CueLists.NextStep.html
namespace	CueLists
usage	http://[ip]:4430/titan/script/2/CueLists/NextStep?handle={handle}
example	http://localhost:4430/titan/script/2/CueLists/NextStep?handle_userNumber=4 (link opens in new tab)
action	advance (goes) the indicated cuelist to the next cue. Similar to hitting Go. Unlike CueLists/Play this can also be used with stopped chasers and then advances this without setting it to run.
parameter	Handle - the cuelist handle to be played
returns	nothing if successful error message if failed.
remarks
