

Web API request

# CueLists/NextStep

Plays the next cue in the specified chase or cue list.

<b>API</b>	<a href="https://api.avolites.com/12.0/CueLists.NextStep.html">https://api.avolites.com/12.0/CueLists.NextStep.html</a>
<b>namespace</b>	CueLists
<b>usage</b>	<code>http://[ip]:4430/titan/script/2/CueLists/NextStep?handle={handle}</code>
<b>example</b>	<a href="http://localhost:4430/titan/script/2/CueLists/NextStep?handle_userNumber=4">http://localhost:4430/titan/script/2/CueLists/NextStep?handle_userNumber=4</a> (link opens in new tab)
<b>action</b>	advance (goes) the indicated cuelist to the next cue. Similar to hitting Go. Unlike <a href="#">CueLists/Play</a> this can also be used with stopped chasers and then advances this without setting it to run.
<b>parameter</b>	<a href="#">Handle</a> - the cuelist handle to be played
<b>returns</b>	nothing if successful error message if failed.
<b>remarks</b>
