

Web API request

Masters/ClearFlash

Clears the flash on a master and resets to the fader level.

API	https://api.avolites.com/12.0/Masters.ClearFlash.html
namespace	Masters
usage	<code>http://[ip]:4430/titan/script/2/Masters/ClearFlash?handle={handle}</code>
example	http://localhost:4430/titan/script/2/Masters/ClearFlash?handle_titanId=1605 (link opens in new tab)
action	un-flashes the grand master and resets it to the previous level
parameter	Handle - the master to be unflashed
returns	nothing if successful error message if request failed
remarks	Using a usernumber to identify the master will fail as masters don't have one. Either assign the master to a handle and use its location or use the reserved Titan ID, see titanId
